

As an industry leading manufacturer of fabricated and cast Fifth wheels for the commercial vehicle market, MHT Europe are committed to the protection of the environment by compliance to all environmental regulations and requirements imposed by the government and others subscribed to by the organisation.

In order to meet these goals, environmental objectives and targets will be implemented and measured to ensure:

- Pollution Prevention
- Compliance to Regulation
- Commitment to continual improvement of the environmental management system with specific focus on the following areas:
  - Energy efficiency
  - Waste minimisation
  - VOC reductions

We will strive to sustain our role as a good corporate citizen.

The scope of our environmental management system considers both the impact of external and internal issues and compliance obligations on the organisation, considering the needs and expectations of interested parties.

All functions, physical boundaries, activities, products and services are considered by management to exercise control over the system.
